

PAST FUTURES

**STRATEGIC AND ADVISORY SERVICES FOR
THOSE RADICALLY REIMAGINING THE
STATUS QUO**

The work of Past Futures is based on the unceded lands of the Wurundjeri Peoples of the Kulin Nation. Sovereignty of these lands, waterways and skies has never been ceded.

Deepest respects are extended to Wurundjeri Ancestors and Elders, whose intergenerational leadership and stewardship have made possible the ongoing work of healing, renewal and reimagining.

These same respects are extended to all Indigenous peoples who Past Futures has the privilege of working alongside, and to the homelands and Country upon which we gather and dream together.

ABOUT PAST FUTURES

Past Futures is a consultancy established to support those at the forefront of systemic change.

Through a range of offerings, we work to deepen and maximise the impact of change initiatives, providing much needed capacity strengthening and external counsel.

We seek to be a trusted voice and sounding board, offering fresh perspectives, new tools, and a relational approach.

With experience across the **nonprofit, philanthropic and for-purpose sectors**, Past Futures provides tailored offerings that meet the unique needs, constraints and opportunities you face.

**Providing
strategic and
advisory
services to
values-driven
initiatives and
organisations.**

OUR APPROACH

Recognizing there is no one way to bring about brighter tomorrows, the work of Past Futures begins in conversation and connection - building the trust and relationship that is foundational to thoughtful and nourishing collaboration.

We co-create alongside partners, with the humble recognition that ideas and imaginings come from community, not consultants.

In exploring the space between where you are and where you want to be, we can help identify what might be needed to elevate and amplify your ongoing efforts, and put forward offerings where we feel we can make the most meaningful contributions.

We believe that how work is done is just as important as the task at hand. Through our practice, we seek to embody the values and principles alive in the just futures we are building towards. This includes a commitment to fostering spaces that are welcoming to full selves and identities, and to incorporating decolonial approaches as part of our own ongoing learning, unlearning and growth.

OUR OFFERINGS
